

How to add a location to the #StirCrazy map

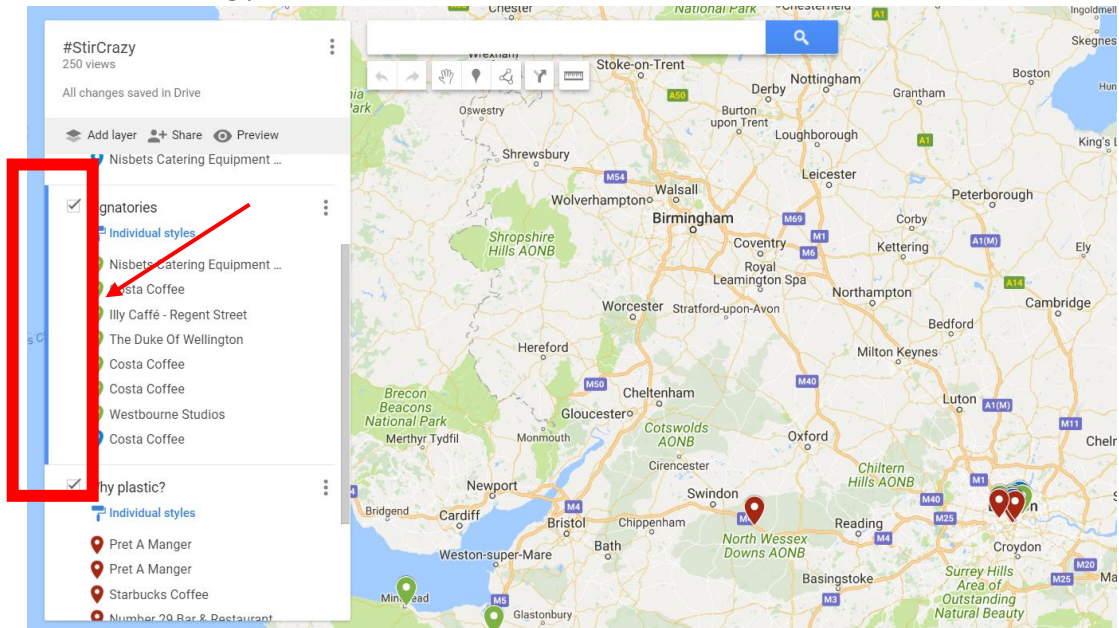

1. Click on the [] icon on the top right side of the map. It will open the map on Google Maps

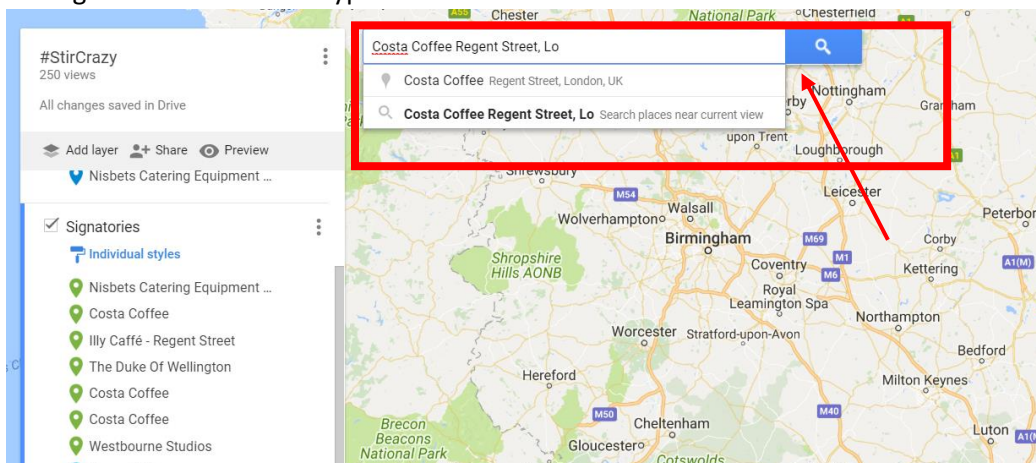

2. Click on Edit on the top left side

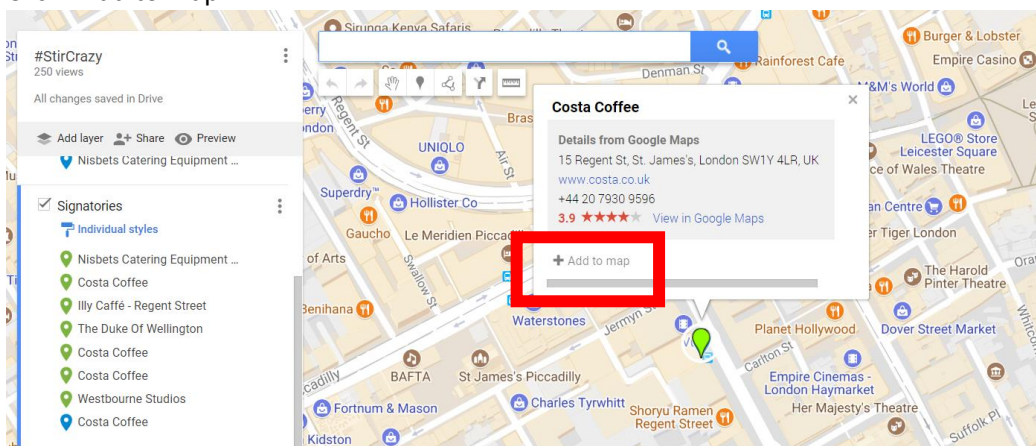

3. Click on the appropriate tab. "Signatories" for establishments that are using alternatives to plastic stirrers, like wooden stirrers and metal spoons. "Why Plastic?" for establishments that are still using plastic stirrers.

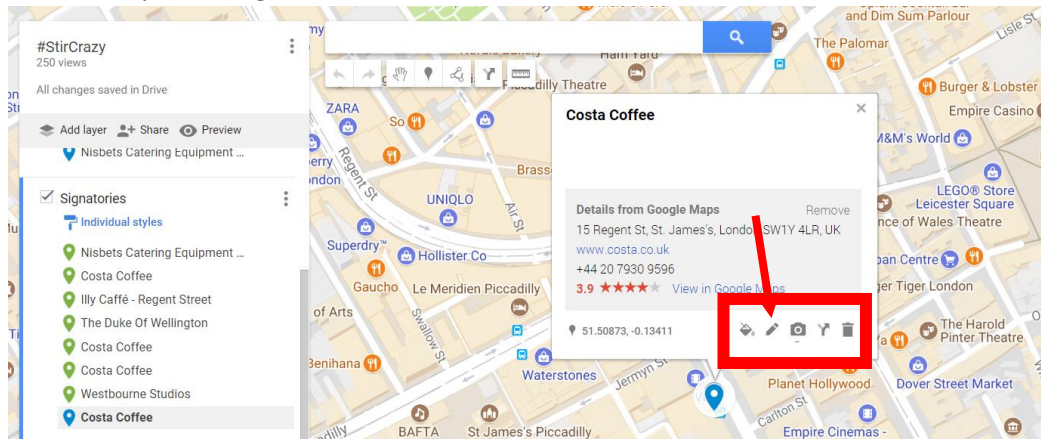

4. Then go to search tab and type the address of the establishment

5. Click "Add to map"

- Now you can edit by clicking on the pencil (edit). You can change the title if you like (we recommend leaving the one suggested by Google), add a description (add what kind of stirrers they are using)

- Add a photo by clicking on the camera icon 

- Save changes

- You can also change the pin colour by clicking on the paint bucket (Style) 

- Save any last changes you made, and you are all set.

Thanks for helping the #StirCrazy campaign to eradicate plastic stirrers from our society
